

Pulmoclear (Pulmoclearine) 100 mcg / 200 mcg inhalation powder

FICTIONAL DEMONSTRATION DOCUMENT — Qorvexa Healthcare is an invented company. This product, its molecule and every clinical statement here are fabricated for software testing. Not medical information. Do not use for any clinical purpose.

Qorvexa Healthcare · Summary of Product Characteristics · Respiratory

1. Name of the medicinal product

Pulmoclear 100 mcg / 200 mcg inhalation powder.

2. Qualitative and quantitative composition

Each inhalation powder contains Pulmoclearine as the active substance. Pulmoclear is a long-acting beta-2 agonist.

4.1 Therapeutic indications

- Maintenance bronchodilation in adults with COPD.

4.2 Posology and method of administration

Population	Dose	Notes
Adults	200 mcg once daily	Same time each day, by inhalation
Elderly	200 mcg once daily	No adjustment

4.2.1 Renal impairment

No adjustment required.

4.2.2 Hepatic impairment

No adjustment required.

4.3 Contraindications

- Hypersensitivity to milk proteins (lactose carrier).

4.5 Interaction with other medicinal products

Interacting substance	Effect and action required
Beta-blockers	May antagonise the bronchodilator effect. Use cardioselective agents where beta-blockade is required.
Diuretics	Additive hypokalaemia risk.

4.8 Undesirable effects

- **Common (1–10%):** Tremor, headache, oropharyngeal candidiasis
- **Uncommon (0.1–1%):** Palpitations, muscle cramps

6.4 Special precautions for storage

Store below 25 °C. Discard 6 weeks after opening the foil.
