

Thyrolen (Thyrolenamide) 20 mg / 40 mg scored tablet

FICTIONAL DEMONSTRATION DOCUMENT — Qorvexa Healthcare is an invented company. This product, its molecule and every clinical statement here are fabricated for software testing. Not medical information. Do not use for any clinical purpose.

Qorvexa Healthcare · Summary of Product Characteristics · Endocrinology

1. Name of the medicinal product

Thyrolen 20 mg / 40 mg scored tablet.

2. Qualitative and quantitative composition

Each scored tablet contains Thyrolenamide as the active substance. Thyrolen is a thyroid peroxidase modulator.

4.1 Therapeutic indications

- Adjunct management of subclinical hypothyroidism in adults.

4.2 Posology and method of administration

Population	Dose	Notes
Adults, initial	20 mg once daily	On an empty stomach, 30 min before breakfast
Adults, titration	40 mg once daily	After 8 weeks if TSH remains elevated
Elderly	20 mg once daily	Do not titrate before 12 weeks

4.2.1 Renal impairment

No adjustment required at any degree of renal impairment.

4.2.2 Hepatic impairment

Reduce to alternate-day dosing in moderate impairment.

4.3 Contraindications

- Untreated thyrotoxicosis.
- Hypersensitivity to Thyrolenamide.

4.5 Interaction with other medicinal products

Interacting substance	Effect and action required
Calcium carbonate	Separate administration by at least 4 hours; absorption is reduced by up to 30%.
Ferrous sulfate	Separate administration by at least 4 hours.
Levothyroxine	Do not co-administer; effects are not additive and over-replacement may result.

4.8 Undesirable effects

- **Common (1–10%):** Palpitations, heat intolerance, mild weight loss
- **Uncommon (0.1–1%):** Anxiety, tremor

6.4 Special precautions for storage

Store below 25 °C, protected from light.
